Assistant Director/Assistant Chief

PRESS RELEASE FOR IMMEDIATE USE

Mexico, Me, Med-Care- Western Maine Affiliate of Sudden Cardiac Arrest Association is pleased to announce that it has deployed an Automated External Defibrillator to a private business. Recently the device was deployed at Oxford Federal Credit Union. Med-Care is proud to be a conduit for businesses such as this to be so forward thinking and educated and caring for their employees, members, and visitors. Understanding the potential for a possible situation and being prepared to deal with it is such a powerful statement by Oxford Federal Credit Union.

Director of Community Outreach Laurieann Milligan – We are pleased to see businesses taking on this proactive approach to the safety and well being of their staff and customers. We hope it is one that will create a trend throughout the region for other businesses to follow that wish to add an additional level of security within their business. Milligan states we are proud to

be serving the community in this capacity. Our mission is to be here for our residents and the overall public and now within our businesses. We are proud to be deploying these units along with the awareness training that will empower individuals to take action.

It also opened our eyes to the fact that we have not advertised and marketed AED's to local businesses and to the fact that these devices are available for their purchase through our organization for this type of use.

This falls directly in line with our mission being part of the Sudden Cardiac Arrest Association

as well as the Heart Safe Community program. Providing Public Education on Cardiac Arrest Risk Factors, Providing Public Education and CPR training, Deploying AED' s, and ensuring that the entire chain of survival is accomplished within our region to eliminate sudden cardiac arrest by 2020 are all part of our goals and objectives at Med-Care Ambulance.

If anyone is interested in additional information on AED' s or if they would be appropriate to consider within your business or home please feel free to give Med-Care a call and speak with Laurieann.

Director of Operations Dean Milligan - Having deployed over 150 AED' s throughout the River Valley Communities in a multitude of strategic locations it may now be time to focus on deploying them into the local businesses and large gathering facilities. Having these devices in businesses and facilities that will surely provide peace of mind and second chances at life for their employees, customers and visitors gives a great feeling of satisfaction to all of us here at Med-Care Ambulance! As our logo states we are " In it For Life" .
